HOME_WORK

Plan and build a Console application that asks a user for their name
and
their age.

If
their name is Bob
or
Sue,
address them
as
Professor.

If
the person is under 21,
recommend they wait X years to start this class.

C# MASTERCOURSE

```

Console.Write("Hello User! What is your first name? ");
string? firstName = Console.ReadLine();

Console.Write($"Hey {firstName}, How old are you ? ");
string? ageText = Console.ReadLine();
int age = int.Parse(ageText);

if (firstName.ToLower() == "bob" ||
    firstName.ToLower() == "sue")
{
    Console.WriteLine("Hello Professor!");
}
else
{
    Console.WriteLine("Welcome Student!");
}
if (age < 21)
{
    Console.WriteLine($"Hello {firstName}! we recommend y
ou to wait {21 - age}");
}
else
{
    Console.WriteLine("Hello Student!");
}

```

Plan and build a Console application that asks a user for their name and their age. If their name is Bob or Sue, address them as Professor. If the person is under 21, recommend they wait X years to start this class.

```
ask for name: {firstName}
```

```
ask for age: {age}
```

```
if {firstName} = Bob or Sue
```

```
    {formattedName} = "Professor" {firstName}
```

```
else
```

```
    {formattedName} = {firstName}
```

```
if age < 21
```

```
    I recommend you wait {21 - age} years, {formattedName}
```

```
else
```

```
    Welcome to class {formattedName}
```
